Cost effective	✅	❌	➖

- **Reduce Costs**; visually identify clusters before outbreaks spread with our built in **Floor Maps**

- **Save time**; real-time reporting with insightful analytics. Saving IPAC clinicians on average 8 hours per month

- Track both **Resident and Staff** infections, lab results and immunizations in one centralized platform

- HealthConnex is **cost-effective**. No need to support your IPAC program with other tools or spreadsheets.

- Innovative mobile apps; conduct **Hand Hygiene, PPE and other audits** with our built in audit applications.

- **Improve Communication; Become proactive with your IPAC program**

HCX

# Join HealthConnex to find out why clinicians love us

With HealthConnex, you become proactive - greatly increasing your staff's ability to detect and respond to infections before they spread. The improved communication has been especially helpful across the entire enterprise - **saving an average 10 hours per facility/month**
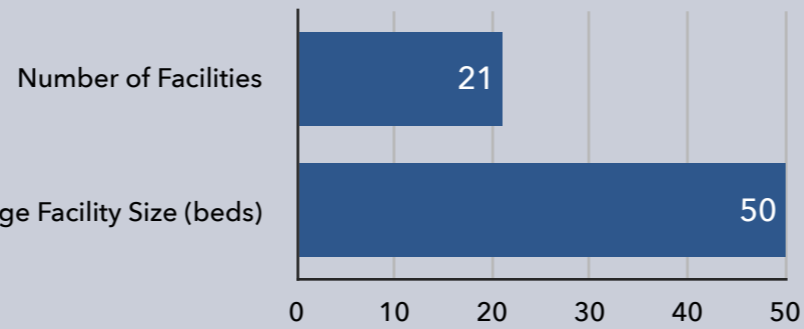

Clinicians use the built-in visual floor maps to identify clusters, investigate possible contacts, and treat and isolate suspected and confirmed infection cases.

Our Organization has **reduced outbreaks by 50%** since implementing HealthConnex.

HealthConnex Product Offerings

Infection Prevention and Control

- Built in visual floor maps offer an enhanced level of detail to view active infections and symptoms. Care staff can document new onset symptoms at the Resident bedside improving tracking and alerts

- Identify, manage, and report on Resident, Staff and Visitor symptoms/infections in a single platform

- Automated surveillance and line listing reports provide all appropriate documentation, supporting both internal and external requirements

- Easy to use mobile applications enhance data collection and visualization. Using HealthConnex improves access to data by the right care providers. No more checking multiple places for information

- Built in Hand Hygiene and PPE audits offer rapid audit results with no more paper tracking

NEW FOR 2023 MyAudits - Rapid auditing capabilities

- A fully customizable auditing platform beyond Hand Hygiene and PPE. Providing a more efficient experience for all of your auditing needs. Examples: Dietary, Environmental Cleaning, Health & Safety, etc..

- Real-time metrics available in seconds. Spot potential performance issues before they result in outbreaks or other gaps in quality service

- Built in data quality metrics allows for improved statistical analysis and performance understanding

The future of Infection Prevention and Control software is HealthConnex

- All new innovative features for our core product are included in the subscription price

- Our core features roadmap for 2023 includes: customizable Antimicrobial Timeout reports, Infection Rate analytics, Days of Therapy analytics, and an improved immunization reporting tool
